

Your New French Hospital

We're redefining health care in San Luis Obispo County.

At French Hospital Medical Center, our work is centered around the needs of our community. We're proud to be named one of the Nation's Top 100 Hospitals and one of the safest hospitals for surgery in the country.

The hospital was founded more than 70 years ago, and our current facility was built in the 1970s. Today, we're simply over capacity.

This \$100 million-plus expansion will double our capacity for general acute care and transform every aspect of delivery of care. Here's what we're adding:

- A new four-story 85,000 square-foot hospital addition
- 95 new private patient rooms for additional comfort and healing
- An eight-bed Neonatal Intensive Care Unit, delivering critical care to the tiniest of patients
- 5 Intensive Care Unit Suites providing life-saving care in critical moments
- A new front entrance and lobby area to fit the growing space
- 90 additional parking spaces for the ease and convenience of our patients and their families
- A helipad to ensure we can get patients requiring emergency care faster when needed
- Expanded space for imaging, labs, materials management, food preparation and more
- Enhanced and advanced technology

These advances will redefine the health care experience in San Luis Obispo County, today and for generations to come.

French Hospital Medical Center

Innovation Through Humankindness

Since Dignity Health acquired French Hospital Medical Center in 2004, we've invested more than \$45 million modernizing the hospital to meet our community's growing needs.

2007 Opened the Copeland, Forbes & Rossi Cardiac Care Center, which has given us national recognition as a premier cardiovascular hospital.

2008 Opened the Hearst Cancer Resource Center, where cancer patients and their loved ones can receive information, spiritual and therapeutic activities and support services.

2014 Built the George Hoag Family Advanced Hybrid Surgical Suite, where patients can be treated with minimally invasive cardiac procedures using state-of-the-art technology.

2015 Built the Copeland Health Education Pavilion, a first-of-its-kind center offering our community advanced health care research and education resources.

2017 Expanded the Stollmeyer Family Birthing Center and Acute Care Nursery to include additional private birthing rooms, a new family waiting area, an upgraded nursing station and a new C-section suite.

In Progress Expanding our Emergency Department into the spacious Oppenheimer Family Center for Emergency Medicine. The new expansion will house the most advanced emergency services center in San Luis Obispo County.

In addition, since 2004 French Hospital Medical Center has given nearly \$25 million to support the underserved, promote healthier lifestyles and provide charity care in our community.

Our community is the center of everything we do.

As this community continues to grow, our hospital's greatest need is more space—the capacity to serve more patients, and increased privacy and comfort for those who entrust us with their care.

So we're growing with you.

Join us in building your New French Hospital.
